I. INTRODUCTION TO FW & PROJECT BACKGROUND

Fairfax Water (FW) serves approximately 2 million customers in Fairfax County and surrounding counties. The customer base includes residential, commercial, municipal, hydrant and wholesale customers.

FW's Customer Service Division uses SAP's Industry Specific Utility (IS-U) Customer Care and Services (CCS) as the utility billing solution to support full meter-to-cash customer lifecycle management. A user interface transaction known as the Customer Interaction Center (CIC) is the existing tool used by Customer Service department along with several other workgroups. FW currently has approximately 280,000 metered customer accounts. The FW Technology Division manages and supports SAP S/4HANA, NetWeaver 7.52 system which includes SAP CCS and the CIC.

SAP IS-U was implemented in 2004. The CIC provides the functionality to support Customer Service's unique business needs. SAP roles govern access both to the CIC and the data and transactions launched from the CIC. Customer Services' transaction volumes and number of users of the CIC greatly exceed all other workgroups of FW.

The need for tools that support the changes and future needs of Customer Services are key reasons for this project. Additionally, SAP support and maintenance for the aging CIC will end in 2024 which is another reason that FW is interested in this replacement initiative. Any proposal to replace the CIC must provide the capability to integrate with FW's SAP footprint.

Below are examples of how the CIC is used by Fairfax Water:

A. Customer Services Call Center – Manage Business Partner information, traditional call center processes including move in/move out, billing and payment overviews, payment plans, etc.
B. Customer Services Revenue Billing – Manage Business Partner information, front office transactions plus billing exceptions, meter data, create and manage field notifications, billing reversals, etc.
C. New Services – Manage Business Partner information, create and manage accounts associated with new requested service, payments, billing, etc.
D. Accounts Receivable - Manage Business Partner information, create SAP SD documents and billing, payments, etc.
E. Meter Shop– Manage Business Partner information, meter data, asset data, create notifications, etc.
F. Other groups, such as the Lab, also create service notifications and field service orders through the CIC

Additionally, Fairfax Water ("FW") is soliciting proposals to provide and implement a unified contact center solution that will serve as contact center technologies. The unified contact center solution must integrate with the CIC replacement, as well as the FW customer portal, and support FW in achieving its customer experience objectives. The integrated solution should streamline

customer support by providing customer account details when contacted by the customer via phone or other communication channels. Customer wait times should be shortened due to multiple communication channel offerings and more informative screens for support personnel. The training effort and duration for new employees should lessen due to a contemporary, more intuitive user interface and access to operating procedures. Also, frontline supervisors will have the necessary data and tools for coaching and monitoring customer satisfaction improvements.

FW is soliciting proposals from Offerors having experience and qualifications in the areas identified in this solicitation. Proposals shall contain evidence of the Offeror's experience and abilities in the specified areas and other disciplines directly related to the proposed work.

FW recognizes that while it is possible for a single implementation partner with related expertise to successfully deliver both the SAP CIC replacement and the Unified Contact Center solution, FW is open to have multiple implementation partners, each with its own area of expertise to work together with FW to deliver the best possible project outcome.

Introduction to Fairfax Water

FW's mission is to provide its customers with reliable and abundant water of exceptional quality at a reasonable price. FW aspires to remain a respected water utility leader, upholding its customers' trust by providing water of exceptional quality and reliability, at a reasonable price, while supporting the high quality of life and economic vitality of the region.

Chartered in 1957 by the Virginia State Corporation Commission as a public, non-profit water utility, FW is governed by a 10-member Board of Directors composed of Fairfax County citizens and appointed by the elected Fairfax County Board of Supervisors. A general manager, supported by a staff of approximately 440 water professionals, manages the day-to-day operations of FW.

FW has one of the lowest commodity rates in the Washington metropolitan region and is one of only a handful of water utilities in the country to receive an AAA rating from the top three financial rating services.

The Virginia Department of Health regulates FW's water quality according to regulations established by the Environmental Protection Agency and based on the Safe Drinking Water Act passed by the U.S. Congress.

FW is Virginia's largest water utility and one of the 25 largest water utilities in the country, serving one out of every five Virginians who obtain their water from public utilities. Nearly two million people in the Northern Virginia communities of Fairfax, Loudoun, Prince William, Fort Belvoir, Herndon, Dulles, Vienna, Alexandria, Falls Church, and Fairfax City depend on FW for superior drinking water.

FW provides water that is treated at four different locations. FW owns and operates the two largest water treatment facilities in Virginia with an average daily water production of 163 million gallons and combined maximum capacity of 376 million gallons per day. The James J. Corbalis Jr.

treatment plant is at the northern tip of Fairfax County and the Frederick P. Griffith Jr. treatment plant is on the southern border of Fairfax County.

FW also purchases water from the McMillan and Dalecarlia treatment plants in Washington DC. They are part of the Washington Aqueduct, owned and operated by the U.S. Army Corps of Engineers.

FW draws raw water from two primary sources: the Potomac River and the Occoquan Reservoir, which is fed by the Occoquan River. The four treatment facilities feed an interconnected distribution system that includes almost 4,000 miles of water mains, 29,000 fire hydrants, and 98,000 valves.

Additional FW information is available at www.fairfaxwater.org.

Background

The following SAP (S/4 HANA on Premise 1909) solutions are fully operational at FW.

SAP

- Customer Care and Service (CCS)
- Financial Accounting (FI)
- Funds Management (FM)
- Materials Management (MM)
- Plant Maintenance (PM)
- Project Systems (PS)
- Human Resources (HR)

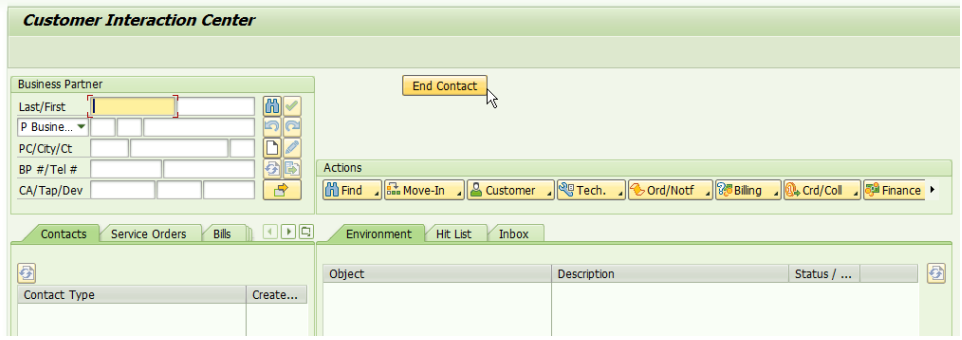

Prior to the project starting, FW plans to update to S/4HANA 2021.

The current FW Contact Center solution is provided using Cisco Unified Contact Center Express (UCCX). It leverages the FW existing companywide Cisco Unified Communications Manager (CUCM) infrastructure for back-end call routing.

Existing SAP CIC System Overview

This provides some general information about the SAP Customer Interaction Center (CIC) and a screen shot to show the CIC. More details can be found in Attachment C, Business Process Catalog.

The CIC is divided into the following regions: areas to perform a search, others to display data, quick overview access to priority information, drop down menus that launch transactions in the background, and the ability to move within SAP and third-party software for necessary information to support customers.

Because different business units have varying processes, the actions and associated linked transactions along with a variety of environment tabs allow the CIC functions to differ to provide unique tools for users to do their work.

Individuals are assigned a CIC profile and the appropriate associated roles to view and access transactions and master data. CIC Customer Service Representatives ("CSR") users will have rights to create and change a Business Partner ("BP") and update attributes. Access to view some areas has been managed due to the confidentiality of the data and a need to restrict by roles so that individuals not working in an area of Customer Service cannot view, create, or change technical master data, contracts, or contract accounts when permission has not been provided.

A standard SAP CIC profile was used as a baseline for the other CIC profiles, and the BP search function is shared by all. There are several general BP transaction calls in the CIC ranging from searching for an existing BP, creating a new BP, and changing BP information. Each CIC profile has multiple transaction calls associated with the specific work of each business unit.

Account Management

Generally, FW bills quarterly. FW creates a customer account to establish an agreement for the provision of a service by a customer. In cases where the BP is identified as a tenant, FW tracks the property owner for the premise and collects a lien offset fee. A customer account reflects the available installed service offerings. It supports a wide array of views into account transactions, consumption, payments, billings, adjustments and account specific notes. Master data is comprised of a customer account and financial relationships for each active service provided at the premise.

New Services

The process of initiating, planning, permitting, and tracking new service requests is done through SAP CIC. Property addresses are created at the time of new service payment known as Connection Objects. The Connection Object stores information such as the physical property address.

Technical master data objects such as the Premise and Installation are system generated in SAP CIC. The Installation maintains values including the type of property (residential, commercial, hydrant, wholesale) location and meter information, and new service fees. Technical master data can be created without a customer record.

For more details, see Attachment C, Business Process Catalog.

Unified Contact Center

The current FW Unified Contact Center solution is provided using Cisco Unified Contact Center Express (UCCX). It leverages the FW existing companywide Cisco Unified Communications Manager (CUCM) infrastructure for back-end call routing. The UCCX server is licensed for 43 CCX Premium seats and 35 CCX Quality Manager seats. It has 7 applications, each with associated scripts, prompts, and triggers. All contact is currently via voice with Enghouse QMS for call recording and quality management. All services are run on Cisco UCS hardware and are managed with VMware vSphere. Agents use Cisco IP telephony with the Finesse agent to handle calls.

The contact center applications are scripts which drive call flows and listed below:

- ITRecordPromptTool
- CS Transfer App
- Xfer to HelpDesk
- CS MainScript
- CS MeterShop
- IT-HelpDesk
- CS MainScript-Test

Organization

The Customer Service group, which resides in the Finance Division, is made up of three teams: Customer Contact, Revenue Management and Support.

The Customer Contact Team is responsible for responding to most direct customer inquiries. The team operates a Contact Center from 8:00 am to 6:00 pm on weekdays to address customer questions and concerns. The Customer Contact Team also responds to customer questions sent in via email, the FW website, or the FW Customer Portal and staffs the front desk of FW headquarters. Specific services provided by the team include assisting customers with opening or closing an account, assisting with billing issues, and scheduling field staff to turn on or turn off water or investigate potential leaks. The team consists of 20 positions and is overseen by the Customer Contact Supervisor.

The Revenue Management Team is responsible for billing and collections. The team is responsible for ensuring that bills are accurate and timely, and for investigating any potential misreads or high bills caused by potential leaks. The team also pursues unpaid bills from delinquent accounts by terminating service and/or issuing liens against the property. There is also a role on the team responsible for setting up service for properties without an existing meter and/or connection. The team consists of nine positions and is overseen by the Revenue Management Supervisor.

The Support Team is responsible for training new CSRs in the Customer Contact and Revenue Management teams, as well as developing and maintaining training manuals and standard operating procedures (SOPs) for teams throughout the department. The team consists of three positions and serves as the liaison to internal company and external groups.

The Transmission Division is also a stakeholder. Emergency Dispatch reports to the Transmission Division, via the Manager of Transmission, and is comprised of four After Hours Dispatchers. The team receives and dispatches calls, contacts emergency personnel and provides emergency information to management personnel during non-business hours. The team also performs routine customer service tasks.

FW has an internal SAP support team centralized in its Technology Division. The support team works closely with Super Users and Business Process Owners in the business areas. The support team consists of:

- Business Process Analysts,
- SAP Developers, and
- System and Security Administrators.

Customer Service and Emergency Dispatch are the primary stakeholders of the contact center. FW has an internal IT as well as an SAP ERP support team centralized in its Technology Division. The IT team supports the existing contact center platform and performs modifications at the request of Customer Service. The SAP support team actively engages in corresponding modifications required in SAP. The list of FW stakeholders include:

- Customer Service Manager
- Customer Service Supervisor
- Customer Contact Supervisor
- Revenue Management Supervisor
- CSRs
- Dispatcher
- Billing CSRs
- Collections CSRs
- New Services CSRs
- IT
- SAP Support

Current Platform

All productive, quality assurance and development instances of the SAP landscape are maintained under a hosting agreement. The present hosting facilities are within the continental United States. This is FW's preferred geographic deployment strategy.

Other Technical Environments and Protocols

Secure, redundant and highly available network connections to all SAP productive, SAP quality assurance, SAP development instances are maintained as part of our SAP landscape hosting agreements.

FW has a local FTP server that communicates with the SAP FTP servers in the hosted environment. Communication with external suppliers' is via FW's local FTP server.

II. PROJECT SCOPE OF SERVICES

The purpose of this solicitation and resulting contract or contracts is to obtain goods and/or services of a qualified Offeror(s) to provide and implement a Unified Contact Center solution for FW's Contact Center and a replacement for the SAP CIC. Offeror(s) should be prepared to project manage, design, build, test, and train the team on the new solution. FW requires that the projects to implement a new CIC and integrated Unified Contact Center are structured to conduct concurrent phases for user acceptance testing and end user training, so that disruption to business operations is minimized.

The successful Offeror(s) to this RFP will be expected to lead TO-BE workshops and interviews, document the requirements and the key business transactions launched via the multiple CICs to work with their solution.

It is desired that a single CIC replacement solution is identified to contain the scope of the replacement effort for all affected business units and minimize the impact of ongoing support and maintenance for the Technology Division. However, the Offeror shall provide a recommendation to FW of products and delivery method to best satisfy project objectives.

FW has identified several areas of interest to include, but not limited to, as to-be workshops:

A. Creating a personalized experience
B. Improving CSR usability and efficiency
C. Achieving a 360 view of the customer
D. Enabling multiple channels of communication (e.g. IVR, chat bots, SMS, email, social media)

2.1 QUALIFICATIONS

Offeror shall have experience working with SAP IS-U CCS, be familiar with the technology options available to FW for the replacement of the CIC and familiar with contact center solutions.

Offeror shall have experience gathering and documenting requirements.

Offeror shall have knowledge of typical business processes of a utility contact center.

Offeror shall provide a minimum of three (3) utilities where the proposed solution has been implemented. References of other utilities will be expected as part of the Offeror's submittal.

2.3 FUNCTIONAL COMPONENTS TO BE CONSIDERED

The scope of this project includes the evaluation of the areas described below:

2.3.1 Implementation Services

FW desires to implement the proposed solution under a controlled approach that mitigates risk and allows FW to take full advantage of the new functionality.

Offerors shall discuss their implementation plan based on the questions provided in the Response Template and account for the cost of the work in the Pricing Workbook.

FW requires an experienced implementation team to provide the services to install the proposed solution in addition to identifying the duration of time that will be required to successfully go-live with the proposed solution. Any information pertaining to staffing and duration should be identified within the Staffing Matrix, Attachment D.

Offerors shall identify the specifics about how their implementation staff will account for training and implementing the solution across the organization.

2.3.2 Cloud/Managed Services

The IT group at FW provides application support, application development and maintenance, database administration, cybersecurity protection, security administration, project management, desktop support, network/server support, and Help Desk services. All on-site computing equipment and software is owned by FW.

FW is looking at the possibility for the CIC replacement and/or unified contact center to be either an on premise or a cloud-based solution.

FW will manage and secure its data, manage user accounts, define, and set application permissions and auditing application access. Offeror shall support FW with IT and business-related issues such as upgrades and configuration changes for a minimum of three (3) years. The focus must be on providing FW with knowledge transfer, not simply performing a service. See Cloud Services Questionnaire in Attachment B.

2.3.3 Integration and Interface Requirements

In addition to the designed integration of the proposed solution, several third-party applications must also be integrated to create a fully functioning system. Detailed interface requirements have been provided in Attachment E of this document. FW desires the Offeror to fully review these interface requirements and provide a detailed response to accomplish the needed integration.

The interface effort should be well documented within the Pricing Workbook (Attachment H), Interface List (Attachment E) and the Staffing Matrix (Attachment D).

For licensing purposes, FW has 475 functional users of the current SAP system.

2.3.4 Management

The Offeror shall manage their proposed team and activities and collaborate with FW on the Solution. The Offeror shall provide a Project Manager as the point-of-contact for the project who can respond and has authority to represent the Offeror and an Enterprise Solutions Architect who can address a holistic enterprise solution. FW will support the project with a Project Officer, a System Administrator and Subject Matter Experts, as needed. Responsibility for the delivery and execution of all work and project deliverables resides with the Offeror. The following table includes the anticipated Offeror project management activities:

Activity	Description	Deliverable(s)
Manage the Implementation	• Manage the Offeror activities and resources including 3rd party contracted resources. • Provide detailed implementation schedule in Gantt chart format showing all major tasks and sub-tasks, proposed start and end dates for each task, assigned resources, expected/dependency on FW activities, critical path and all related fees. • Facilitate and provide routine status reports including budgeting, pending decisions, dependencies, schedule, overall status of activities, issues and risks. • Facilitate weekly status calls with updated detailed project schedule, issues, risks, budget, and action items.	High level plan within 30 days of Contract Award. Detailed Project Schedule (Gantt chart) Status Reports
Account Management	• Manage all activities within the hosting environment for the CIC Replacement and Contact Center.	
Technical Management	• Primary contact for all technical and system operation activities managed under this solution. • Manage and identify personnel that are required to ensure the proper operation of the supported system. This includes but is not limited to database, application, network and operating system administrators. • Manage the performance of all technical task for the supported systems. • Maintain an issue list and risk list that addresses all current and future (planned) activities, risks, and issues currently being worked.	Root Cause Analyses Annual Disaster Recover (DR) Test Plan and Results Issues List Risk List

2.3.5 Solution Planning

The Offeror shall be responsible for facilitating the implementation process in conjunction with FW's staff and our current SAP hosting partner. The following table includes Contractor anticipated solution planning activities:

Activity	Description	Deliverable(s)
Define the Implementation Plans	• Define the implementation plan including but not limited to: ○ Roles and responsibilities of Offeror; ○ Roles and responsibilities of FW staff; ○ Roles and responsibilities of FW hosting partner; ○ Implementation assumptions; ○ Implementation validation and FW verification and approval;	Implementation Plan for CIC Replacement/ Call Center application. Implementation Plan for CIC Replacement/Call Center landscape Change Management Plan Test Plan Conversion/Data Migration Plan Deployment Plan Post Deployment Support Plan
Define the Platform Architecture	• Identify new platform and network components for development, quality assurance and production. • Operating costs, including licenses for the operating systems, are the responsibility of the Offeror proposing a SaaS solution.	Platform and Network Architecture Diagrams for CIC Replacement/Call Center and its DR environments

2.3.6 Implementation

FW desires an Offeror with a proven, clear implementation methodology, an approach to phasing the implementation that provides value early in the process without introducing undue risk, a process for mitigating known risks and identifying potential unknown risks, and a detailed project work plan that addresses project management best practices. The following table includes Contractor anticipated implementation activities:

Activity	Description	Deliverable
Implement New Landscape	• Set up and verify the platform architecture. • Set up and verify the network architecture. • Set up and verify the security and access.	New Solution
Implement New Application	• Execute the planned implementation and validation steps. • Verify the implementation. • Report on implementation execution results.	Report completion of implementation
Training	• End users, Business Process Analysts, Key users and Administrators	Training Schedule
Go Live	• On board existing Administrators, End Users, Business Process Analysts • Verify final landscape.	

Post Deployment Support (Hypercare)	• Achieve stabilization by identifying and resolving all critical (system outage) and high (significant degradation of one or more services without an acceptable workaround) incidents related to the project(s) • Provide knowledge transfer to FW staff for all resolved and open incidents • Obtain approval from FW to close incidents and end post deployment support	Summary report of all incidents found after deployment Detailed root cause analysis for all critical and high incidents

2.3.7 Maintenance and Support

The Offeror shall provide maintenance and support services if proposing their proprietary (non-SAP) Software as a Service (SaaS) solution in conjunction with FW's staff, current SAP hosting partner and other vendors as appropriate. The following table includes Offeror anticipated maintenance and support activities for SaaS proposals:

Activity	Description	Deliverable
Backup and Recovery	• Provide backup and recovery strategy. • Provide data retention policy and period off-site storage and recovery time (recovery point objective, recovery time objective).	Rehearsed Restore Findings
Security Administration	• Provide a SOC 2 Type 2 audit report demonstrating a sufficiency of operation controls over time and their effectiveness. • Provide cyber security strategy, posture and operations including resources available to respond in the case of a breach.	SOC 2 Type 2 Audit Report
Disaster Recovery	• Provide disaster recovery strategy, including level of redundancy across the suite of facilities and services contemplated and how the various points of failure are addressed. Specify the guaranteed recovery timeframe.	Disaster Recovery Plan
Performance Administration	• Provide a comprehensive service level agreement, including performance thresholds, recovery point objective, recovery time objective, response times and priority thresholds.	Service Level Agreement Service Level Compliance Report
Certification of Data Destruction	• Data storage areas (including backups or other alternative storage resources) are taken out of service.	Certificate of Data Destruction
Scope of services	• Provide a list of services and their frequency that are provided by the Offeror. • Describe how FW-specific customizations/code enhancements are made to your solution during implementation. • Describe the process for requesting customizations post go-live. • Does it require a new contract/statement of work.	List of Services Change Management

	• Provide information regarding any delays on such a change.	
Responsibility Matrix	• Provide a responsibility matrix indicating who has the primary role for performing the listed task.	Responsibility Matrix

III. INSTRUCTIONS TO OFFERORS

3.1 ADDITIONAL INFORMATION

All questions relating to this solicitation shall be submitted in writing to Elizabeth B. Dooley, CPPO, CPPB, Procurement Program Lead Buyer, in the Procurement Department via email to edooley@fairfaxwater.org. For a question to be considered, the subject line of the email should state the following: RFP 22-041 Questions. Questions should be succinct and must include the submitter's name, title, company name, company address, and telephone number. Prior to the award of a contract resulting from this solicitation, Offerors and prospective Offerors are prohibited from contacting any FW staff other than those assigned to the Procurement Department.

RFP 22-041 – TENTATIVE SCHEDULE

RFP ISSUANCE	Thursday, October 6, 2022
PRE-PROPOSAL MEETING	Monday, October 17, 2022 @ 11 am ET
QUESTION DEADLINE	Friday, October 21, 2022
ADDENDUM 1 ISSUANCE	Friday, October 28, 2022
PROPOSALS DUE	Wednesday, November 16, 2022 @ 2 pm ET
ORAL PRESENTATIONS	Week of January 9, 2023
NEGOTIATIONS	TBD
AWARD	TBD
CONTRACT COMMENCEMENT	TBD

If any questions or responses require revisions to this solicitation as it was originally published, such revisions will be by formal addendum only. If this solicitation includes a separate FW contact for technical information, Offerors are cautioned that any written, electronic, or oral representations made by any FW representative or other person that appear to change materially any portion of the solicitation shall not be relied upon unless subsequently ratified by a written addendum to this solicitation issued by the Procurement Department.

3.2 TRADE SECRETS OR PROPRIETARY INFORMATION

Trade secrets or proprietary information that is submitted by an Offeror in connection with a procurement transaction may be exempted from public disclosure under the Virginia Freedom of Information Act ("VFOIA"). However, the Offeror must invoke the protection of this subsection prior to or upon submission of the data or other materials, and must identify clearly and in writing, on the Proposal Form, the data or other materials sought to be protected and state the reasons why protection is necessary or falls within the exceptions to the VFOIA. It is the Offeror's sole responsibility to defend such exemptions if challenged in a court of competent jurisdiction.

3.3 DEBARMENT STATUS

The Offeror shall indicate, in the space provided on the Proposal Form, whether or not it, or any of its principals, is/are currently debarred from submitting proposals to FW or any other state or political subdivision, and whether or not it is an agent of any person or entity that is currently debarred from submitting proposals to FW or any other state or political subdivision. An affirmative response may be considered grounds for rejection of the proposal.

3.4 CONFLICT OF INTEREST STATEMENT

The Offeror must provide a statement regarding potential conflict of interest. The certification shall be in the form provided in this solicitation, signed by an authorized agent and principal of the Offeror and notarized.

3.5 QUALIFICATION OF OFFERORS

Each Offeror may be required, before the award of any contract, to show to the complete satisfaction of the Procurement Manager that it has the necessary facilities, ability, and financial resources to comply with the contract and furnish the service, material or goods specified herein in a satisfactory manner. Each Offeror may also be required to provide past history and references which will enable the Procurement Manager to be satisfied as to the Offeror's qualifications. Failure to qualify according to the foregoing requirements will justify rejection by FW of a proposal and its respective Offeror.

3.6 OFFEROR INVESTIGATIONS

Before submitting a proposal, each Offeror shall make all investigations and examinations necessary to ascertain all conditions and requirements affecting the full performance of the contract and to verify any representations made by FW that the Offeror will rely upon. No pleas of ignorance of such conditions and requirements resulting from failure to make such investigations and examinations will relieve the successful Offeror from its obligation to comply in every detail with all provisions and requirements of the contract documents, or will be accepted as a basis for any claim whatsoever for any monetary consideration on the part of the successful Offeror.

3.7 COMPETITIVE NEGOTIATION FOR NON-PROFESSIONAL SERVICES

This solicitation is let under the Virginia Public Procurement Act (VPPA) procedure, “Competitive Negotiation for Goods and Services”. Under this procedure, the content of the proposals, and the identity of the Offerors are not public record until an award determination has been made. Because of this restriction, the opening of proposals is not public.

3.8 AUTHORITY TO TRANSACT BUSINESS

Any Offeror organized as a stock or non-stock corporation, limited liability company, business trust, or limited partnership or registered as a registered limited liability partnership shall be authorized to transact business in the Commonwealth of Virginia as a domestic or foreign

business entity if so required by Title 13.1 or Title 50 of the Code of Virginia, or as otherwise required by law. The proper and full legal name of the firm or entity and the identification number issued to the Offeror by the Virginia State Corporation Commission must be written in the space provided on the Proposal Form. Any Offeror that is not required to be authorized to transact business in the Commonwealth shall include in its proposal a statement describing why the Offeror is not required to be so authorized. FW may require a firm to provide documentation prior to award which: 1) clearly identifies the complete name and legal form of the firm or entity (i.e. corporation, limited partnership, etc.), and 2) establishes that the firm or entity is authorized by the State Corporation Commission to transact business in Virginia. Failure of a prospective and/or successful Offeror to provide such documentation shall be grounds for rejection of the proposal or cancellation of the award. For further information refer to the Commonwealth of Virginia State Corporation Commission website at: www.scc.virginia.gov.

3.9 INSURANCE REQUIREMENTS

Each Offeror must review the insurance requirements section carefully with its insurance agent or broker prior to submitting a proposal to ensure they can provide the specific coverage requirements and limits applicable to this solicitation. If the Offeror is not able to meet the insurance requirements of the solicitation, alternate insurance coverage satisfactory to FW may be proposed by the Offeror and considered by FW. Written requests for consideration of alternate coverage must be received by the FW Procurement Manager at least ten (10) calendar days prior to the date set for receipt of proposals. If FW denies the request for alternate coverage, the coverage required by the Insurance Requirements section must be provided. If FW permits alternate coverage, an addendum to the Insurance Checklist will be issued prior to the time and date set for receipt of proposals.

3.10 INTEREST IN MORE THAN ONE PROPOSAL, AND COLLUSION

More than one proposal received in response to this solicitation from an individual, firm, partnership, corporation, affiliate, or association under the same or different names will be rejected. Reasonable grounds for believing that an Offeror is interested in more than one (1) proposal for a solicitation both as an Offeror and as a subcontractor for another Offeror, will result in rejection of all proposals in which the Offeror is interested. However, a firm acting only as a subcontractor may be included as a subcontractor for two (2) or more Offerors submitting a proposal for the work. Any or all proposals may be rejected if reasonable grounds exist for believing that collusion exists among any Offerors. Offerors rejected under the above provisions shall be disqualified if they respond to a re-solicitation for the same work.

3.11 PROPOSAL WITHDRAWAL

No proposal may be withdrawn after it is filed unless the Offeror makes a request in writing to the FW Procurement Manager prior to the time and date set for the receipt of proposals or unless FW fails to award or issue a notice of intent to award a contract within one hundred and twenty (120) days after the date and time set for receipt of proposals.

3.12 OPTIONAL RIDER CLAUSE

Subject to the mutual agreement between the parties, any contract awarded on the basis of this solicitation may be used by any public entity (to include jurisdictions comprising the Metropolitan Washington Council of Governments), to enter into a contract for the services described and defined herein. For single purchases, the contract may be used for up to 12 months from the actual date of contract award. For multi-year contracts, the contract may be used throughout the effective period of the contract. Contracts awarded as a result of this solicitation will be subject to these terms and conditions, and/or such terms and conditions as may be required by the controlling body for the public agency using the contract. Pricing shall be as offered by the successful Offeror and subsequently accepted by FW.

3.13 CONTRACT AWARD IS IN THE BEST INTEREST

FW reserves the right to accept or reject proposals, to waive any informalities or irregularities therein and to contract as the best interests of FW may require in order to obtain the goods and/or services that best meet the needs of FW, as described in this RFP. Selection of a proposal does not mean that all aspects of the proposal are acceptable to FW. FW reserves the right to negotiate the modification of terms and conditions with the Offeror offering the best value to FW in conjunction with the evaluation criteria contained herein prior to the execution of a contract, to ensure a satisfactory contract.

3.14 NOTICE OF DECISION TO AWARD

FW will post a written Notice of Decision to Award on our public website, stating the date the decision to award was made, and identifying the name(s) of the awardee(s).

IV. PROPOSAL REQUIREMENTS

4.1 GENERAL

Proposals must be submitted in hard copy, and must be fully executed. FAILURE TO SUBMIT A PROPOSAL WITH A FULLY-COMPLETED PROPOSAL FORM USING THE PROPOSAL FORM PROVIDED IN THIS SOLICITATION MAY BE CAUSE FOR REJECTION OF THE PROPOSAL. The Proposal Form must be signed by a person authorized to legally bind the Offeror.

Offerors must include an original longhand signature in at least one of the proposals submitted, and shall clearly mark on the face of that proposal the word "ORIGINAL". The additional copies required herein may include photocopies of the original Proposal Form.

Modification of or additions to any portion or terms of the solicitation may be cause for rejection of the proposal; however, FW reserves the right to decide, on a case-by-case basis, in its sole discretion, whether or not to reject such a proposal as nonresponsive.

Proposals not submitted in the number of copies requested are subject to immediate rejection. Proposals submitted by facsimile or electronically will NOT be accepted.

Proposals and all documents related to this solicitation submitted to FW by an Offeror or a prospective Offeror shall, upon receipt by FW, become the property of FW.

The Offeror's proposal shall address the required information identified under the Proposal Submittal Elements section below, in the order listed, and shall not exceed the stated page limitations, if any. The proposal shall be limited to a page size of 8 ½" x 11", single space and type size shall not be less than 10 point font for each response item. Note: for page-counting purposes, a page equals a one-sided sheet. If a page limit is not noted within the section below there is no page limit.

4.2 EXPENSES INCURRED IN PREPARING PROPOSAL

FW accepts no responsibility for any expense incurred by any Offeror in the preparation and presentation of a proposal. All expenses related to an offer are the sole responsibility of the Offeror.

4.3 PROPOSAL FORM SUBMISSION

The required Proposal Form is provided with this solicitation. One (1) proposal with a Proposal Form containing an original longhand signature, and nine (9) additional copies, each including a photocopy of the original signed Proposal Form (ten (10) copies total), and an electronic copy of the proposal on a SharePoint site which can be accessed by FW, shall be submitted by hand in a sealed envelope no later than the time and date deadline specified in this solicitation to:

Fairfax Water
Procurement Department

8570 Executive Park Avenue
Fairfax, Virginia 22031

Timely submission of the proposal is solely the responsibility of the Offeror. Proposals received after the specified date and time will be rejected. The exterior of the envelope or package shall indicate the name of the Offeror, the scheduled proposal submission date and time, and the number of the solicitation. The time and date of receipt shall be indicated on the envelope or package by FW.

4.4 INCOMPLETE DOCUMENTS

Each Offeror is responsible for having determined the accuracy and/or completeness of the solicitation documents upon which it relied in making its proposal, and has an affirmative obligation to notify FW Procurement Manager immediately upon discovery of an apparent or suspected inaccuracy, error in, or omission of any pages, drawings, sections, or addenda whose omission from the documents was apparent from a reference or page numbering or other indication in the solicitation documents.

If a potential Offeror downloaded an electronic version of the solicitation documents, that potential Offeror is responsible for determining the accuracy and/or completeness of the electronic documents.

If the successful Offeror proceeds with any activity that may be affected by an inaccuracy, error in, or omission in the solicitation documents of which it is aware but has not notified FW Procurement Manager, the Offeror hereby agrees to perform any work described in such missing or incomplete documents at the Offeror's sole expense and at no additional cost to FW.

4.5 PROPOSAL STANDARDS

Proposal submitted in response to this solicitation shall meet standards of professional writing established for the type of report or written material provided, shall be thoroughly researched for accuracy of content, shall be grammatically correct and not contain spelling errors and shall be submitted in a format outlined herein. Whenever possible, proposals submitted in response to this solicitation shall comply with the following guidelines:

- All copies should be printed on at least thirty percent (30%) recycled-content and/or tree-free paper;
- All copies shall be double-sided;
- Covers or binders shall be recyclable, made from recycled materials, and/or easily removable to allow for recycling of pages (proposals with glued bindings that meet all other requirements are acceptable);
- The use of plastic covers or dividers should be avoided;
- Unnecessary attachments or documents not specifically asked for should not be submitted, and superfluous use of paper (e.g. separate title sheets or chapter dividers) should be avoided; and

- Numbered tabs and dividers are required for each of the sections listed and in the order below:

    - PROPOSAL FORM
    - EXECUTIVE SUMMARY
    - SOLUTION EXPERIENCE
    - SOLUTION OVERVIEW
    - IMPLEMENTATION PLAN AND METHODOLOGY
    - PROJECT ORGANIZATION AND STAFFING
    - REFERENCES
    - FINANCIAL STABILITY
    - ATTACHMENT A-1 – EXCEPTIONS TO FAIRFAX WATER CONTRACT TERMS AND CONDITIONS
    - ATTACHMENT B – QUESTIONNAIRE
    - ATTACHMENT D – STAFFING MATRIX
    - ATTACHMENT E – INTERFACE LISTING
    - ATTACHMENT F – PRODUCT ROAD MAP
    - ATTACHMENT G – PRICING WORKBOOK
    - ATTACHMENT H– SAMPLE SERVICE LEVEL AGREEMENTS
    - ATTACHMENT I – IMPLEMENTATION SCHEDULE
    - ATTACHMENT J – SAP CIC REPLACEMENT FUNCTIONAL REQUIREMENTS
    - ATTACHMENT K – UNIFIED CONTACT CENTER REQUIREMENTS

4.6 PROPOSAL STANDARDS

4.6.1 Proposal Form

Attachment A – Proposal Form must be fully completed and submitted in Tab I or the proposal could be deemed non-responsive. This attachment also includes the Conflict of Interest Statement & Insurance Checklist.

4.6.2 Executive Summary

The Offeror's proposal shall contain an executive summary that summarizes why their firm is the most qualified for this scope of work, anticipated challenges, and innovative approaches, and opportunities for cost savings.

4.6.3 Solution Experience

Offerors shall describe its experience, capabilities and other qualifications for this project.

4.6.4 Solution Overview

The Offeror shall provide an overview of the CIC replacement including the standard and ad hoc reporting capabilities of the system.

The Offeror's solution overview shall include the current screenshots detailing the interaction between the CIC replacement and related systems.

- CSR typical views including but not limited to:
    - Customer Search
    - Landing page with customer, account, and service billing information
    - Customer consumption history
    - Customer payment history
    - One customer with multiple service locations
    - One customer with multiple services
    - Premise maintenance
    - Contacts
    - Device or meter
    - Customer billing
    - Account balance
    - Dunning
    - Service order screen(s) to create, maintain, close

4.6.5 Pricing

Monthly invoicing for services will be provided to FW. Invoicing will identify services rendered, pricing and agency specific service usage. Offeror must describe its process or policies for adjusting agency level billing due to failing to meet SLA's.

Flexible pricing will be applied when services are either increased or decreased. Offeror must describe its process or policies that will address the flexible pricing requirements.

Response to the pricing identified in Attachment H, Pricing Workbook, must be submitted in paper copy, and followed up by an email electronic copy. In addition, Offeror shall provide any assumptions that would help FW to understand the cost proposal.

4.6.6 References

FW will select past clients based on the information provided by the Offeror in Solution Experience and perform reference checks. No additional information needs to be submitted by Offerors in this section. Provide a list of at least three references of customers, preferably utilities similar to FW who have implemented with your services/solution related to this RFP. Provide complete contact information (name, business address, email, and two contact phone numbers)

4.6.7 Financial Stability

The Offeror shall provide a letter from an independent auditor attesting to the financial stability of the Offeror. NOTE: review of financial stability will not be performed during the evaluation of written proposal, and is therefore not part of the evaluation criteria for review of written proposals. Additional information may be requested by FW related to the Financial Stability of the Offeror.

4.6.8 Exceptions to Fairfax Water Contract Terms and Conditions

Offerors shall submit a copy of Attachment A-1 – Contract Terms and Conditions with any exceptions to the standard language noted. Fairfax Water will take exceptions into consideration when reviewing Offeror proposals.

V. EVALUATION PROCESS

Fairfax Water (hereinafter "FW") is soliciting proposals from Offerors having experience and qualifications in the area identified in this solicitation. Each proposal must contain evidence of the Offeror's experience and abilities in the specified area and other disciplines directly related to the proposed work. Other information required by FW may include the submission of profiles and resumes of the staff to be assigned to the project, references, illustrative examples of similar work performed, and other information that will clearly demonstrate the Offeror's expertise in the area of the services sought by this solicitation. Offerors are encouraged to elaborate on their qualifications and performance data or staff expertise, as well as provide alternative concepts.

An Evaluation Committee will review and evaluate all written proposals and identify firms that may be invited to submit more detailed proposals, conduct oral presentations, and/or provide product or service demonstrations. The evaluation of written proposals will be based on the evaluation criteria identified elsewhere in this solicitation. The Evaluation Committee will rely upon the information provided in the written proposals submitted in order to select finalists. Subsequent stages of the process to select firms for negotiations may include, but are not limited to, review of more detailed proposals, oral presentations, or demonstrations. If such subsequent stages are conducted, they will be evaluated based on the same evaluation criteria used to evaluate written proposals, as relevant to the areas being evaluated. FW may award a contract or initiate negotiations with one or more Offerors without further contact with any other Offerors.

By submitting a proposal response, each firm acknowledges its understanding and willingness to comply with the requirements of this RFP. After FW issues notice of shortlisted firms, each selected firm shall acknowledge of such notice by accepting invitation to conduct Oral Presentations. Oral presentations: The "Considered" firms will deliver the oral presentation to the FW Selection Committee over Microsoft Teams. No onsite presentation will be available to proposers. The oral presentation for the RFP will be limited to a maximum of 3 hours, and the Proposer shall be contacted by the FW Procurement.

VI. RFP ATTACHMENTS

FAIRFAX WATER
REQUEST FOR PROPOSALS NO. 20-041

Attachment A – Proposal Form

THE UNDERSIGNED UNDERSTANDS AND ACKNOWLEDGES THE FOLLOWING:

THE OFFICIAL, TRUE, AND COMPLETE COPY OF THE SOLICITATION DOCUMENTS, WHICH SHALL INCLUDE ANY ADDENDUMS THERETO, IS THE ELECTRONIC COPY OF THE SOLICITATION DOCUMENTS AVAILABLE FROM FW'S WEBSITE AT: http://www.fairfaxwater.org/procurement/current_bids.htm.

POTENTIAL OFFERORS ARE RESPONSIBLE FOR DETERMINING THE ACCURACY AND COMPLETENESS OF ALL SOLICITATION DOCUMENTS THEY RECEIVE, INCLUDING DOCUMENTS OBTAINED FROM FW, AND DOCUMENTS OBTAINED FROM ALL OTHER SOURCES.

l. ALL MATERIAL (PROPOSAL AND ATTACHMENTS) SUBMITTED SHALL BE IN TEN (10) COPIES, CONSISTING OF: ONE PROPOSAL, CLEARLY MARKED ON ITS COVER WITH THE WORD "ORIGINAL", WHICH SHALL INCLUDE THIS PROPOSAL FORM CONTAINING AN ORIGINAL LONGHAND SIGNATURE; AND NINE (9) ADDITIONAL COPIES, WHICH SHALL INCLUDE A PHOTOCOPY OF THE ORIGINAL SIGNED PROPOSAL FORM AND A ELECTRONIC COPY OF THE PROPOSAL ON SHAREPOINT SITE ACCESSABLE BY FW. THE ORIGINAL, SIGNED PROPOSAL FORM SHALL BE THE FIRST PAGE OF THE ORIGINAL PROPOSAL.
2. INDICATE THE NAME AND CONTACT INFORMATION OF THE PERSON WHO CAN RESPOND AUTHORITATIVELY TO ANY QUESTIONS REGARDING THIS PROPOSAL (PROJECT MANAGER).

NAME (PRINTED): _____ TITLE: _____

OFFEROR NAME:_____ AUTH. SIGNATURE:_____

Attachment B – Questionnaire

Offeror must complete the Cloud Questionnaire using the supplied template.

Attachment C – Business Process Catalog

Business Process Catalog Attachment includes Fairfax Water known processes, reports, data objects and workflows that are provided to assist in understanding the current CIC functionality, customizations and integrations.

Attachment D – Staffing Matrix

Complete and return Response Template Attachment D – Staffing Matrix provided with the RFP package.

The Staffing Matrix is used to understand Fairfax Water's and Vendor's staffing levels throughout the duration of the system implementation.

Vendor should clearly outline skill sets, FTE counts, and other resources required for both Fairfax Water's and all Vendor resources, including third-parties, if appropriate. Vendor also should identify the number of months for the entire project in Attachment J The vendor should identity the necessary staff and percentage of time for each of the months.

Attachment E – Interface Listing

Please use the Interface Listing to describe how you will integrate these systems with the proposed systems. In most instances, Fairfax Water expects this functionality to be part of the new system. If this is not included functionality, please price as an additional interface or modification.

Attachment F – Product Road Map

Describe how you have met your Product Roadmap objectives for the past 5 years. Provide any current and future product or service plans (including timelines) that may be pertinent to Fairfax Water. In addition, provide your formal product plans.

Attachment G – Pricing Workbook

Attachment H - Pricing Workbook is provided to present the proposed pricing for the entire project. The Vendor shall provide a detailed breakdown of all costs required for the successful implementation and ongoing operation of the proposed solution utilizing the Pricing Workbook distributed with the Response Template of this RFP.

Fairfax Water reserves the right to determine what a valid cost is. Cost must be submitted in U.S. dollars.

The Business Process Catalog, Attachment C, includes Fairfax Water known processes, reports and workflows that are provided to assist in understanding the current CIC functionality, customizations and integrations. The document is provided so the Vendor can properly determine the cost associated with the CIC Replacement.

If additional information or items need to be added within the Pricing Workbook, space has been provided for the use of Vendors. It is imperative that the Pricing Workbook reflect the full cost of the solution and be fully completed and returned with the Proposal for the Proposal to be considered responsive.

Attachment H – Sample SLAs

The Vendor shall submit proposed sample SLAs.

Attachment I – Implementation Schedule

Provide a Gantt chart summarizing the major phases of the project implementation based on Vendor's methodology. The chart must include phase description and duration (in days) and graphically represent the phase dependencies.

Attachment J – SAP CIC Replacement Functional Workbook

Complete and return the CIC Functional Requirements that are provided with the RFP package. Please complete all tabs. Vendor MUST NOT change the format of the spreadsheet.

Attachment K – Unified Contact Center Requirements Workbook

Complete and return the Unified Contact Functional Requirements that are provided with the RFP package. Please complete all tabs. Vendor MUST NOT change the format of the spreadsheet.
